Because of the excessive cost of packing small orders, no order will be accepted for less than five trees, and no order for less than one dollar value. All orders must be in multiples of five trees of a kind.

A PART OF OUR 35 ACRES OF SMALL TREES

Our Policy

of fair dealings with our customers has built our business from an output of 20,000 trees ten years ago to an output of over 2,000,000 trees in 1936. We intend to stay in the nursery business, and we want all our customers to be satisfied in all their dealings with us. Therefore, we offer you only the best trees—trees that will live and grow.

Our Guarantee

Every tree sold by us from this price list that does not live will be replaced absolutely free of charge if we are notified of the number of dead trees previous to October 1, 1938. Notice of the loss of trees received by us after this date does not entitle you to replacements. No varieties or sizes of trees sold by us and not listed in this price list are guaranteed to live. Shipment of replacements will be made at the proper time for planting either during the spring season of 1938, or the Fall planting season of 1938.

We do our part. YOU must do yours to make your trees live. Get them promptly from the express company or Post Office. Unpack and plant immediately.

DO NOT LET THE ROOTS DRY OUT

OUR TREES ARE *Guaranteed to Live* ... YET THEY COST YOU NO MORE!

DOUGLAS FIR

AUSTRIAN PINE

VARIETIES AND DESCRIPTIONS OF OUR "GUARANTEED TO LIVE" EVERGREENS

AMERICAN ARBORVITAE. Also called White Cedar. Excellent for hedges and windbreaks. Dark green foliage. May be pruned back to any desired height. Prefers moist soil.

PYRAMIDAL ARBORVITAE. Columnar shape. Very popular for formal planting. Grows to 15 to 20 feet. Rich soil.

RED CEDAR. Pyramidal shape. Valuable for formal work where height is needed. Good soil.

PLUME CYPRESS. Bright green foliage. Conical growth. Moist soil.

BALSAM FIR. Symmetrical, fragrant. Flat blue-green needles. Prefers medium to heavy soil and will thrive in shade.

CONCOLOR FIR. Blue-green needles. Pyramidal growth. Needs moist soil.

DOUGLAS FIR. Soft dark green to gray-blue needles. Rapid grower. Medium soil.

FRASER FIR. Shining dark green leaves with white bands underneath. Grows to about 70 feet. Medium to moist soil.

NIKKO FIR. One of the most satisfactory and ornamental firs; it forms a broad base pyramidal tree usually densely branched to the ground and with dark green lustrous foliage. Needs heavy soil and moderate shade. Height at maturity up to 120 ft.

CANADIAN HEMLOCK. Lacy, graceful foliage—easily pruned. Prefers shade, but will live in sunlight. Moist soil.

PFITZER'S JUNIPER. Broad, bushy habit. Grows in either shade or sun. Bluish-green foliage. Very popular for foundation work. Good soil.

EUROPEAN LARCH. Bright green feather foliage. Deciduous. Prefers moist soil. Slender, pyramidal form. Very fast growing.

MUGHO PINE. Dwarf, slow growing. Hardy everywhere except in wet soil.

RED PINE. Dense foliage, beautiful, long deep-green needles. Rapid growing. Will thrive in dry soil. Requires sunlight.

SCOTCH PINE. Rapid growing and very ornamental. Light gray-green foliage. Will grow in poor soil and adverse conditions. Good for screens where quick growth is desired.

WHITE PINE. The beautiful five leafed pine of native Northeastern United States. Rapid grower. Prefers light sandy soil. Spreading limbs, but easily adapted to windbreaks and screens.

BLACK HILL SPRUCE. Very compact tree of pyramidal growth. Grows to a height of 20 to 30 feet. Prefers medium wet soil.

COLORADO BLUE SPRUCE. Ranges in shade from slightly blue-green to marvelous blue. The handsome ungrafted, short-leaved tree, native of Colorado. Grows in any soil. Prefers sunlight.

ENGELMANN SPRUCE. Leaves blue-green to steel-blue. Flowers purple. Fully as beautiful as the Colorado blue Spruce but not as widely known. Good moist soil.

NORWAY SPRUCE. Graceful, symmetrical tree of rapid growth. Pendulous branches, dark green foliage. Makes excellent hedges and windbreaks. Will stand clipping and pruning. Prefers heavy soil and will grow in partial shade.

RED SPRUCE. Not unlike white spruce as to shape and size of branches, but reddish-green bark and dark green foliage. Slower growing than Norway spruce. Makes good hedges.

WHITE SPRUCE. Upright and symmetrical; light silvery-green foliage. Makes good hedges and windbreaks. Will stand clipping and pruning. Prefers heavy soil and will grow in partial shade.

PLANTING AND CARE

To plant these small trees, use a trowel or shovel and make a hole large enough to accommodate the roots when they are well spread out. Put a little water in the hole, pack the earth around the roots, keeping them well spread. When the hole is filled, pack the earth down firmly so that no air can get to the roots to dry them out. Be very careful between the time you receive the trees and the time you plant them not to let the roots dry out. Dry roots are always fatal to an evergreen. If you are planting the trees in your garden to let them grow a few years before putting them in their permanent locations, keep them about a foot apart. If you are not ready to put them in their permanent location at the end of two years, be sure to transplant them again, placing them two feet apart.

Black Hill Spruce

American Arborvitae

Pfitzer Juniper

UNSOLICITED LETTERS FROM CUSTOMERS

"The 10 Blue Spruce arrived about two weeks ago in excellent condition. They are bigger and better rooted than I thought possible at the price."

K. J. K., Kenosha, Wis.

"Little trees received. Am much pleased with them. Hope to send larger order next spring."

M.B., Emerson, Iowa

"My order of trees arrived this morning in excellent condition."

G. W. B., Burnside, Ia.

"I received my 50 evergreens about three weeks ago. You cannot imagine the very pleasant surprise I experienced when I saw how large and healthy the trees were, and for such a low price."

R. G. N., Orchard Park, N. Y.

"We received the ten Colorado Blue Spruce about a month ago, and we are delighted. Every one has fully an inch of new tips, and hope to find room to plant more evergreens next year. Thank you."

H.M., San Francisco, Cal.

"Our ten small Colorado Blue Spruce arrived Sat. and we are very pleased with them and their condition on arrival."

A. U., Flint, Mich.

"We received the ten Colorado Blue Spruce and some are planted. Very good looking stock."

A.N.H., Pittsburg, Pa.

"The Douglas Fir I sent for were the best evergreens I have ever bought."

J.C., Elk Horn, Iowa

"The little evergreens I ordered from you arrived in excellent condition. They certainly are fine specimens with the best root systems I ever saw on small trees. I see no reason why they should not mature into healthy, hardy trees—they have the right start."

R.B.M., Castleton, N. Y.

"This may be unusual in business at this day and time, but about September 1931 I ordered one hundred little evergreens from you—a three dollar collection—consisting of 25 each of the following: Norway Spruce, White Spruce, Scotch Pine, and Norway Red Pine.

"The little trees were too long at the express office, and in bad condition. Also the autumn was hot and dry. I treated the roots in a bath of loamy mud and planted them as recommended.

"Checking them today I have 25 Norway Spruce which average 4 ft. high and 3 to 4 ft. spread, 12 White Spruce slightly smaller, 6 Scotch Pine 6 to 8 ft. tall, and 6 Red Pine 4 to 5 ft. tall.

"At the present time they are worth from \$300.00 to \$500.00 right here. A good investment."

Frank Porter, Beckley, W. Va.

"Received a small order from you several years ago, more or less for the purpose of testing our soil for the raising of evergreens as heretofore I have raised mostly deciduous plants and was dumbfounded to see the wonderful root system your stock has and the ability of these small evergreens to withstand winter heaving due to alternate thawing and freezing in this state. The tops were also nicely foliated and well proportioned and in spite of the draught they came through 100%."

J.N., Chicago, Ill.

"I'm glad to say that all the trees I've received from you during the three years I've dealt with your nursery have been very satisfactory. Nearly all of them have grown into well shaped healthy lawn specimens, especially the Blue Spruce. I've found that your trees adapt themselves very readily to the climate here which is more than I can say for trees I've received from other nurseries. I certainly shall not hesitate to recommend you to others."

E.S., Albany, N. Y.

"About eight years ago I purchased one of your combination offers. I did not know how to keep proper care then of the different varieties of trees and so a number of them died. Even considering this the value of these trees today, compared with local nursery prices, is around one hundred and twenty dollars. The original cost of the trees was around four dollars."

D.E., Auburn, Wash.
